

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información importante sobre su agua potable. Si lo necesita traducido, comuníquese con nosotros al 970-920-5110.

Dear City of Aspen Utilities Customer:

Findings from the required monthly reporting information submitted to the Colorado Department of Public Health and Environment (CDPHE) for the month of February 2023 resulted in notification to Aspen Water Department on March 15, 2023 of the violations noted below.

The City of Aspen monitors water quality 24 hours a day, seven days a week, to ensure the water is safe for consumption. The violation was a clerical error, was not an emergency, and did not require the use of an alternate water source. There were no adverse health impacts from the violation and no actions were needed by water customers.

This notification complies with federal and state laws requiring water systems to notify customers when a drinking water standard is not in compliance.

Failure to Monitor or Timely Report – Entry Point Disinfectant

The City is required to submit various water system data monthly to the Colorado Department of Public Health and Environment. Monthly data is due prior to the end of the 10th day of the following month. February 2023 data for entry point disinfectant residual was erroneously submitted with a clerical error which left the cell confirming the number of samples taken empty. The City took all of the required entry point disinfectant samples and the corrected clerical error was received by the State on March 20, 2023. A more thorough quality assurance review of State reports has been implemented to reduce these kinds of errors. The Aspen Water Department remedied all actions which resulted in the violation notice for the month of February 2023, and the system was back in compliance in March 2023.
