

ENGINEERING POLICY: 300-2014
Temporary and Permanent Groundwater Dewatering Policy
Date: April 7, 2014

Policy:

Permanent or temporary dewatering projects may not adversely affect adjacent and or nearby properties. The cone of depression from any dewatering effort may not extend past the property line unless the applicant has demonstrated with a groundwater study that other properties will experience no adverse effects due to the dewatering project. The conclusions of the groundwater study must be approved by the City Engineer. If adverse impacts are suspected or a variance is requested, then the following might be necessary: a) stop work order, b) further study of impacts, and/or c) mitigation of impacts.

Approved by: Trish Aragon, P.E., City Engineer
