

ENGINEERING POLICY: 400-2014

IFFR – FEE POLICY

Date: October 9, 2014

The engineering fee and CMP fee will be discounted by 90% for those projects performing IFFR work only. The full engineering and CMP fees will be assessed when the project submits for its full building permit.

The discount may not apply if it is determined that the IFFR work will have a large impact to surrounding properties or the duration of the project is such that it will require an increased level of inspection services.

Examples of high impact include but are not limited to: Greater than 10,000 sq ft disturbance, or duration greater than 30 days.

Approved by: Trish Aragon, P.E., City Engineer
