

**ENGINEERING POLICY: 200-2019**

**West End Curb & Gutter Policy**

**Date: August 7, 2019**

---

**Policy:**

Given the variety of West End curb and gutter installations, properties are required to match the neighboring property's curb and gutter type (mountable or barrier). The new curb and gutter must be compliant with City of Aspen Engineering Standards, whether it is mountable or barrier. Curb and gutter must smoothly transition into existing neighboring conditions at tie in point(s), and flow line must remain in line with neighboring curb and gutter or connect with neighboring drainage infrastructure. If a property has two different curb and gutter shapes at tie-in locations, then it is the property owner's choice of which curb to install so long as it meets the standards.

Approved by: Trish Aragon, P.E., City Engineer
