Hogan Peterson, Regional Director  
Jeff Small, Chief of Staff

Dear Congresswoman Boebert and staff:

Thank you for valued time last week. As Colorado's Third Congressional District representative, we appreciate your deep concerns and professional expertise on the pressing priorities we were able to share. Of common concern, as duly noted and discussed, are our natural resources, water rights and storage, infrastructure, and forestry legislation. It was reassuring to know your team shares the same policy heavy concerns for clean water storage within in our borders, hydropower, managing forests and the fuel load on federal lands. The western slope can only benefit through building and committing to continuing valued connections.

We appreciate your energy and focus toward the SHRED Act, Colorado Drought Task Force, Colorado Forest & Water Health Alliance, the Western Climate Resilience Framework and transit options such as RFTA. We look forward to hearing more about the America's Infrastructure Modernization (AIM) Act, the MORE PILT Act, and how the Western Water Security Act that will benefit our local headwaters community.

Thank you.

  
Rachael Richards
