

AMERICA'S STATE AND LOCAL GOVERNMENTS COMMIT TO DRIVE EQUITABLE BUILDING ENERGY AND CLIMATE POLICY

GOVERNMENTS ACROSS THE NATION LAUNCH EFFORTS TO
INCLUSIVELY DESIGN AND IMPLEMENT BUILDING PERFORMANCE
STANDARDS AND COMPLEMENTARY PROGRAMS AND POLICIES

As mayors, governors, county executives, and tribal leaders, we are joining in Coalition, with a heightened ambition to unlock the full human and climate potential of our built environment. Aligning our emissions reduction and equity goals with building upgrade and retrofit programs, we commit to lead the effort to decarbonize America's building sector. We will identify and act on the pre-requisites for building performance standards or other complementary policies, and will work to advance legislation with a goal of adoption by Earth Day, 2024. In doing so, we will work with stakeholders, especially frontline communities, to design and implement programs and policies that will address our health, energy, housing affordability, and climate needs in buildings. Forging a community of practice in policy innovation, we commit to sharing our results and best practices with one another.

The time for action is here, and we invite our peers nation-wide to partner with us.

Signed,

A handwritten signature in blue ink, appearing to read "Torre", with a stylized flourish at the end.

Torre

Mayor, City of Aspen
