CITY OF ASPEN

AIR GAP VERIFICATION

FOR MOBILE APPLICATIONS

A completed Air Gap Verification form must be on file with each water supplier you obtain water from and a copy kept in the vehicle.

The form must be signed and dated by a certified ABPA/ASSE backflow assembly tester. The Air Gap Verification form shall be submitted and kept on file. The form must be filled out and signed by the owner /owner's agent who is responsible for the fabrication, maintenance and repair of any air gap to be used on tank trucks, trailer mounted fill spouts or any other tank designed to carry water obtained from any potable water distribution system.
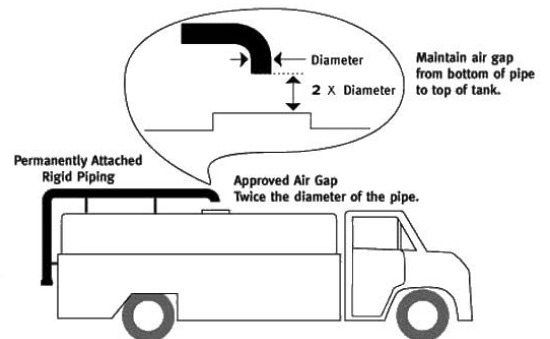

A certified ASSE/ABPA tester can be provided by City of Aspen Water Department or found at
https://aspen.gov/1156/Cross-Connection-Control-Program
Form must also be signed by the owner or owner's agent.

MINIMUM SPECIFICATIONS FOR A MOBILE AIR GAP:
(Applies to external piping only)

1. Vertical distance from discharge pipe to the flood level the container must be at least two times the diameter of discharge pipe.
2. No hoses to prevent spillage or splashing shall be attached to the discharge pipe at any time.
