

ENGINEERING POLICY: 2023-06

Snowmelt in Ramps

Date: January 13, 2023

Snowmelt within ramps in the public right-of-way shall extend through the ramp and continue through the gutter to the edge of the asphalt. Snowmelt shall further extend longitudinally along the gutter on both sides of the ramp to the nearest control joint in the gutter. Snowmelt is not permitted to end at the gutter flowline as it crosses the ramp as this causes icing issues within the pedestrian path.

Approved by: Trish Aragon, P.E., City Engineer

Tricia Aragon
